

SOLUTION SHEET N°5

Wrapping films

Single-use plastic(s) concerned :

Wrapping films for body treatments

Area: Swimming pool / Spa

Prioritisation criteria: very high volumes, not sorted for recycling

Description of use:

Wrapping is a treatment technique that consists of coating the body with a mixture of seaweed, mud or various active ingredients with therapeutic properties. A plastic film is then applied, followed by a blanket to warm the body.

Selected alternative

Traditional reusable dark-coloured linen
or cotton fouta

Environmental and social issues :

- High likelihood of customer acceptance
- For staff: 80% acceptable, no additional costs if they buy them from the hotel laundry.

Technical and economic information :

- Suppliers : Artisans
- Competitive prices

OUR ADVICE

Encouraging hoteliers
Customer appreciation (cultural and artistic)
