

SOLUTION SHEET NO. 9

Welcome kit for children

Disposable plastic(s) concerned :

Welcome kit for children

Space : Welcome desk

Usage description :

Kit distributed at reception when families check in.

Alternative chosen

Kit containing plastic-free toys: colouring booklet, crayons, hotel treasure hunt, dominos box, etc.

Environmental and social issues :

Depending on the products initially included in the kit, the potential for reducing the quantity of plastic is significant.

Technical and economic information :

The cost depends on the products chosen.

Alternatives not selected and why

The sweet box at reception to replace an individual packet of sweets. This alternative was withdrawn because it generated a heavy workload (filling, cleaning and service) for reception staff.

OUR ADVICE

To limit the environmental impact as much as possible, the ideal solution is to completely dematerialise this kit by replacing it with an experience. For example, a treasure hunt in the hotel.
