

# Solution sheet – Towards a zero single-use plastic hotel

*Created as part of Beyond Plastic Med's hotel training programme*

---

Title of the solution: Slippers in cloth bag

Solution tested by: Poseidonia Beach Hotel

Single-use plastic(s) targeted: Slippers in cloth bag replaced slippers being presented in plastic wrapping.

Area: Guest Rooms

Presentation of the alternative: This alternative is placed upon check-in only. We have created a corner in the wardrobe (away from the water in the sink to make sure that the cloth packaging will not get wet and can be preserved incase guests do not use it) where amenities are being placed with our environmental card and water scarcity card.

Technical and economic information: Unit Price: 0.16 euros

Social and environmental aspects: Guests have welcomed the cloth packaging. Ideally, on an environmental scale, having no packaging at all will be the ideal solution, but we are concerned with guests' hygiene skepticism.

Your advice: This amenity could be placed on demand, which will definitely reduce its consumption. Trying the option of placing it without packaging at all will definitely be worth trying as it reduces unnecessary waste (if guests will not raise hygiene concerns). Proper presentation will be key.
